

FORENSIC EVIDENCE RECOVERY DOGS

Two specialist Labradors. Anticipated availability: early 2027.

ADVANCED TRAINING IN PROGRESS | ENQUIRIES NOW OPEN

A specialist capability for complex investigations.

Trained to assist homicide investigations, missing person enquiries and disaster search operations - helping agencies locate remains, trace evidence and identify areas for further examination.

OPERATIONAL SUPPORT

- Clandestine grave search and recovery support
- Surface and elevated human remains location
- Vehicle and item screening for contact with human decomposition
- Human blood detection at scenes, in vehicles and on property

INVESTIGATIVE ADVANTAGE

Capable of working on and off lead across extensive search areas, including crime scenes, vehicle screenings and property line-ups.

They help identify areas of interest and evidential opportunities that conventional methods may miss.

PROVEN OPERATIONAL VALUE

Previously trained and deployed dogs have assisted with the recovery of homicide victims, missing persons and evidential material - supporting convictions and helping progress cold cases.

KEY BENEFITS

- **Complex operations**
Specialist support for homicide, missing person and disaster searches.
- **Evidence-focused**
Capability to locate victims, remains, blood and evidential material.
- **Areas of interest**
Helps focus investigation where conventional methods may be limited.
- **Stronger outcomes**
Potential to progress cold cases and support successful outcome
